Subject: Hydrology & Water Resources Symposium 2012 - reminder that call for abstracts closes in 1 week!
Attachments: HWRS12 Call For Papers.pdf
Importance: High

19 – 22 November 2012
Dockside, Sydney, NSW, Australia

Dear Colleagues,

On behalf of the Hydrology and Water Resources Symposium (HWRS) 2012 Organising Committee, I would like to remind you that the call for abstracts for the Symposium closes in 1 week - **MONDAY, 19 MARCH 2012.**

Abstracts can be submitted via the Symposium website www.hwrs2012.org.au on the 'Abstract Submission' page.

A flyer with further information including important dates for the Symposium is attached to this email.

If you have any queries, please do not hesitate to contact me.

Regards

Melissa

Follow Up Flag: Follow up
Flag Status: Flagged

Dear colleague,

I am pleased to inform you that your abstract "Understanding Treatment Characteristics of Constructed Stormwater Wetlands", reference 0090 has been accepted as an oral presentation at HWRS 2012.

Your abstract has been reviewed and accepted. You will need to log into your record to view the comments made by the reviewers. To log on go to <https://conferenceaction.conference-services.net/authorlogin.asp?conferenceID=3093&language=en-uk>

Attached to this email is a template to follow when preparing your full paper submission. Please review and apply this template carefully. Submitted papers not conforming to the template format will be rejected.

General notes:

CASE STUDIES

Authors are reminded that, as a general rule, case studies are only accepted where they show some new or novel approach to a problem or have findings that are worth sharing with industry. Case studies that do not meet these criteria or just use ordinary Australian practice will be rejected.

NEW MATERIAL

All papers need to be sufficiently different from previously published material to be considered new material. Papers that are considered to be recycled from previously published papers will be rejected. It should be noted that these papers are unlikely to comply with copyright requirements.

MULTIPLE PAPERS

Presenters will generally be restricted to a maximum of 2 oral publications and can assist the conference by indicating which papers they would prefer as poster papers. Where a series of related papers are submitted that have different presenters, the authors need to ensure that individual papers contain unique information and discussion points. Where this is not the case, it might not be possible for all to be accepted as oral presentations.

Important Dates:

Paper Submission Closes - 16 July 2012; Paper Review by Scientific Committee - 17 July 2012 to 10 August 2012; Acceptance/Advise of changes to papers - 13 August 2012; Final Submission - 7 September 2012; Papers Finalised - 28 September 2012

Kind Regards,
Dr Seth Westra,
Chair, HWRS 2012 Scientific Committee

BRISBANE QLD 4001
AUSTRALIA

Dear Prasanna,

Thank you for registering to the **Hydrology and Water Resources Symposium 2012** being held at Dockside, Sydney, NSW, Australia from 19 - 22 November 2012.

Please find below your official registration receipt details. You will also find a tax invoice receipt attached for your records.

Registration material for the event (name badge, function tickets & detailed program) may be collected from the HWRS 2012 Symposium Registration Desk located Cockle Bay Room 1 at Dockside Sydney during the below times:

- * 1600 - 1930 hours on Monday, 19 November 2012
- * 0730 - 1700 hours on Tuesday, 20 November 2012
- * 0730 - 1700 hours on Wednesday, 21 November 2012
- * 0730 - 1700 hours on Thursday, 22 November 2012

Please do not hesitate to contact me if you have any queries.

Kindest Regards
HWRS 2012 Secretariat

Welcome

On behalf of the Organising Committee, I am delighted to welcome you to Sydney for the 34th Hydrology and Water Resources Symposium, "HWRS2012".

HWRS2012 has attracted a diverse range of high quality podium and poster presentations. Over the three days of the symposium, delegates will report on progress made understanding the major uncertainties facing water resources managers in the coming decades and on insights dealing with these challenges. The contributing authors are to be commended for the technical excellence of their papers and for their willingness to share their knowledge and expertise with fellow professionals.

The Symposium Proceedings compile 196 papers that we trust will provide a lasting record of the Symposium's contribution to the science and practice of hydrology and water resources engineering and management.

Paper topics cover a broad and diverse range of issues including:

- Climate Variability and Change
- Quantifying and Managing Uncertainty in Estimates
- Design Rainfalls
- Flood and Precipitation Extremes
- Water Resource Management
- Drought
- Flood Modelling and Forecasting
- Operational Hydrology
- Land-Use and Climate Change Impacts on Hydrology
- Hydrological Modelling

- River Hydraulics and Infrastructure
- Rainwater Tanks and Sustainability
- Groundwater and Surface Water Interactions
- Urban Hydrology
- Water Resource Modelling
- Hydroinformatics
- Australian Rainfall and Runoff
- Water Quality and River Health
- Water Quality and Sediment Dynamics
- Water Demand
- Stochastic Hydrology

In addition to this, three eminent speakers have kindly accepted the organising committee's invitation to present keynote addresses.

The technical committee is extremely grateful to the large number of reviewers who assisted the committee in reviewing the papers. The large amount of time spent in this process has been of great benefit to all the authors. I am also grateful for the support of our host Engineers Australia and the sponsors, without whom a Symposium such as this could not be successfully staged.

If you are a visitor to Sydney, I know you will enjoy your time in our city and hope you take the opportunity to discover the city's charm and our magnificent harbour and beaches.

Thank you for coming. We look forward to meeting you during the HWRS 2012 Symposium.

Grantley Smith

Chair of Organising Committee

34th Hydrology and Water Resources Symposium
Sydney 2012

Paper Review Process

All papers presented at HWRS2012 have been blind peer reviewed through a formal and rigorous process, as outlined below. In response to the Call for Papers inviting Abstracts sent out in 2011, the Organising Committee received 330 abstracts of proposed papers. Members of the Organising Committee assigned reviewers from the Scientific Committee and other Technical Reviewers throughout the world to evaluate all of the papers with regard to their suitability for the Symposium. The authors of 320 abstracts were invited to prepare a full paper for presentation at the conference. 300 papers were offered a platform presentation and 20 authors were offered a poster presentation for their paper.

The Panel of Reviewers consisted of the Scientific Committee and other international and national experts in fields relevant to the Conference sub-themes. The Panel reviewed 206 full papers submitted for publication in the Conference Proceedings. All papers submitted for platform or poster presentation were blind peer reviewed by at least two independent reviewers according to a set of criteria established by the independent Scientific Committee. Reviewers were asked to assess the paper against these criteria and provide comments on the paper for both the author and the Organising Committee. Authors were then requested to revise their manuscript in accordance with reviewers' comments and to submit for final review before inclusion in the Proceedings.

The final proceedings were edited by Dr Seth Westra.

The HWRS 2012 Committee would like to thank the following for their timely contribution in reviewing papers:

Saima Aijaz	Khaled Haddad	Raj Mehrotra	Chowdhury Shahadat
Lisa Alexander	Gavin Hay	Andrew Metcalfe	Ashish Sharma
Mark Babister	Andrew Herron	Tom Micevski	Kristen Sih
