C. Comments about the Paper

Please provide a comment review and final recommendation of the paper could be published in International Journal or IJCST Proceeding

Below are some comments that have to be addressed by the authors so that the manuscript can be considered for further publication:

1. The abstract is too long.
2. In the Introduction there is a sentence " There is limited research has been reported on semi-preserved natural condiment paste". This sentence has to refer to some or many references.
3. Format of the figures does not follow the author guide (template). In Figure 2-5 the quality is not that good and some legends are missing.
4. References do not follow the author guide (template) and there are still some Indonesian languages. Please refer to International publication.
