Dear Winston Pontoh and Novi Swandari Budiarmo,  
We have pleasure in informing you that the reviewing process was completed.  
Here are the comments concerning your manuscript titled "THE MODERATING EFFECT OF SHAREHOLDER FEATURES ON DIVIDEND DISBURSEMENT: EVIDENCE FROM INDONESIA" ppm-522-0518:

1. The paper is poorly written. A lot of sentences are grammatically wrong, and it required a lot of guesswork just to understand what the author(s) is(are) trying to say. It is also bad in terms of structure. To get it published will require not only grammatically right phrasing, but also good writing in general.
2. The abstract is too long. An abstract of half a page for an 8-page paper is not appropriate.
3. The introduction is too short and sketchy. It doesn't give a proper treatment of the research problem and motivations behind it.
4. Literature review isn't good, either, especially on similar studies for Indonesia. The paper mentions one such study, but it doesn't address the issue of how different this paper is from the other paper and what contribution this paper will make.
5. The paper doesn't address how the sample has been chosen. It says "the study selects 241 listed firms," but doesn't say anything about selection criteria. The methodology is barely acceptable. There are no control variables, and the way the variables are normalized is also questionable. Another issue is that the
