

AACL Bioflux - response to your submitted manuscript

Dari: Tudor Papuc (ptudor2008@yahoo.com)

Kepada: sanger.grace@yahoo.co.id

Tanggal: Senin, 1 April 2019 05:40 GMT+8

Dear Dr. Sanger Grace,

We have received your manuscript **"PHENOLICS CONTENT AND ANTIOXIDANT ACTIVITIES OF FIVE SEAWEEDS OBTAINED FROM COASTAL AREA IN NORTH SULAWESI, INDONESIA"**.

We are honored that you considered our journal for publishing your manuscript.

However, we cannot accept the manuscript in this form.

Please improve the English language and respect the format of our journal (besides the different format, you also have a different structure - in our journal, Results and Discussion are different chapters).

After you have made these changes, you can submit again your manuscript, directly to me, with a submission letter for your manuscript.

Please find attached a model paper, the instruction for authors and a submission letter.

Thank you and I wish you luck,

Best Regards,
Tudor Păpuc

Dear Grace,

Ok, please read all the message carefully.

The manuscript still has poor English, so I suggest this:

I am giving you the payment details and a letter of preliminary acceptance. After I receive a confirmation of payment, I will personally correct the English, however, this will take a little more time.

I will not correct the English before payment since there is always the risk that the authors will take the corrected manuscript before payment and publish it elsewhere, so

our work would be for nothing (we had this problem before). Please do not take this personally, we do this for all the manuscripts.

And after I make the corrections, I will send the manuscript to reviewers. Since this is already time consuming, I suggest you tell me the name of 2 reviewers, and I will consider sending the manuscript to one of them. I will find the other one.

After this acceptance you should pay 250 USD for publication (open access).

As the payment and bank transfer may be time consuming you can start the process of payment; we will send you the invoice immediately after the payment. There is no problem if for some reason you pay later, but the longer you delay the payment, the longer will take to publish the manuscript.

Please let us know when the payment is done (scanned receipt) in order to start the publishing process.

In case the peer-reviews suggest rejection, we will return the payment. The payment will not be returned in case of withdrawal request by authors or simply lack of feedback.

Please note that the Publishing House Policy does not allow to start the manuscript editing prior payment.

Here are the info for payment;
take care to write correct the details:

Beneficiary: Bioflux SRL
City: Cluj-Napoca
Country: Romania, European Union

SWIFT CODE of the bank: BTRLRO22

Account USD: RO68BTRL01302202L28614XX

Bank: BANCA TRANSILVANIA

Important! When bank transfer is used to pay a publication fee, please pay attention to which modality of payment you chose! There are three options: Ben, Our, Us.

Use always "Us" option (meaning that all the bank transfer costs are in your concern/ authors support them and not the publisher). If you forgot to mention that and you let the bank to set "Ben" or "Our" options, we receive about 210 usd instead of 250 usd. Such payments are not valid and you need to pay again for the rest of the sum and one more transfer charge. This situation is not desirable.

There is a second method of payment, by Paypal, with credit card. Please let me know if you choose this method and I will redirect you to our colleague which is in charge of this procedure.

Let me know if you agree with this and if not, please propose a solution.

Thank you for publishing with us!

Best regards,
Tudor Papuc

Ok, I have confirmation of payment.

I will soon revise the English and meanwhile, I am searching for reviewers.

If you find a reviewer at a later date, please tell me, and I will consider sending to him/her the manuscript.

Best Regards,
Tudor Papuc

Hello,

It has been some time since I updated you regarding the status of your paper.

Your manuscript had the English corrected and sent to a first reviewer, which send back the evaluation (accepted with major modifications).

As I am searching for the second reviewer, I am sending you the comments from the first reviewer.

Please try to correct the manuscript and send it back to me, and I will try to send the corrected manuscript (being a better version) to the second reviewer. The reason I am

doing this is because I do not want to risk the second review being negative, after so much work on this manuscript. The first reviewer want to reject, but said that if all suggestions are addressed, the paper could be publishable.

Best Regards,
Tudor Păpuc

Dear Tudor Papuc
Editor, Bioflux SRL

I corrected the manuscript according to the suggestion by reviewer. In the method of DPPH and FRAP assay, the procedure is the same with the author, but the modification was done in concentration of reagent, the reason it was done based on few experiments before.

I do hope your help to published the manuscript, I am very hopeful, God bless you, in Lord Jesus Christ. Thanks.
Best regard, Grace Sanger..

Please find attached the manuscript with comments regarding the references. It is very bad. You need to correct it properly. You will see all the comments in the text. Please pay more attention to how you cite other works.

Also, there is a text at the end, after the references. It is copied from a different paper, as an example. You need to write there your (the authors) full names and affiliations, exactly as presented there.

When you send me the manuscript, also please write if you agree with the publication, because I will not change the text anymore, only format the paper, and publish the manuscript.

Check it with attention, because this is the last chance you have to change something, if you wish. After publishing, we cannot change the paper.

Best Regards,
Tudor Păpuc

Congratulations! The manuscript has been published.

You can find it here (on our site): <http://www.bioflux.com.ro/docs/2019.2041-2050.pdf> or in the attachment.

I had to publish it with the date of 1 Nov 2019, because the issue just opened, and being the first manuscript, it had to have a previous date. I hope that is ok.

Thank you very much for your hard work and cooperation!

Best Regards,
Tudor Păpuc
