Article Type: Research Article

Comments to the Author

Minor revisions

The manuscript titled 'Anti-cervical Cancer Activity of Seaweeds Obtained from North Sulawesi Coastal Area' written in scientific language that is good and easy to understand and the methods are easy to duplicate. I appreciate the author's contribution in finding a cervical cancer treatment solution by exploring marine-based natural ingredients. The English is good enough and meets the quality for publication in the Journal of Applied Pharmaceutical Science. However, I suggest that authors can improve some parts of this manuscript. In the following I provide some information for authors to improve their manuscript.

Title

- Already seen describing the contents of the manuscript. Can think of an alternative of 'obtained' word.

Abstract

- Already represent the background, methods, results and conclusions.

Keywords

- The selected keywords already represent the subjects of the manuscript

Introduction

- The aim of this study should be written elaborate in a separate paragraph.

Methods and Materials

- In the materials and method section, write the version of all the software used for this study.

- Please check all the symbols used in the methods and materials

Results and discussion

- In my opinion, the content of the results and discussion is exciting and thought-provoking

Conclusions

- Conclusion section written is adequate. But grammatical improvements can be made.

Figures

- Figures are self-explanatory Can be improved the outlook.

General remarks

-In conclusion, I find this study's theme very interesting, timing, and relevant. I consider it appropriate to be published after the suggested minor revisions.

=> Reviewer # 2

This work is well enough, but there are several suggestion by reviewer to improve the manuscript quality.

1. The main work of this article is cytotoxic assessment, It must be mentioned the word "Cytotoxicity" in the title
2. Give a clear claim which one of the seaweed is the best! Did it accomplish to medical safety standard for human use ?. Give the statement
3. There are several grammatical error in manuscript, especially in tense and the missing of verb in some sentence. Please do the grammatical check
4. The antioxidant activity in this work is studied by cytotoxic assessment, especially by IC50. State this in the introduction as the research basis in data collection.
5. There are several errors in writing the quantities and units. Please check carefully
6. The authors state that cytotoxic activity in this work is possible contributed through antioxidant activity, but the IC50 showed that the best cytotoxic activity proved by decurrens. However the antioxidant assessment through TPC, DPPH and FRAP showed the high antioxidant activity were not contributed by decurrens, but by other seaweeds. Please give the explanation about this finding.
7. Give clear suggestion which seaweeds has the best Anti-cervical Cancer Activity. Consider IC50 besides TPC, DPPH and FRAP in making a final conclusion.
